Steve -

Not sure where we stand but wanted to get back with you to see if you've had any success. The task order that we are working on ends mid November so we are on a short time fuse. I think that we have been able to get the raw data off of SWIMS...I cannot access but Tetra Tech seems to be able to so I still need to verify the status of SWIMS via the web....but we are looking for all of the metrics that were calculated as part of the NRSA report. There are a lot of files on the NARS fileshare ftp site so absent looking at each, is it possible for someone to direct me to the appropriate file with the metrics if they are there. If not there, then where can they be found?

LOL...confusing? Never. Let me dig into it. SWIMS as it was before is not available but there is availability to current OW data for folks who are in need of it...not sure how this works through OW. So let me find out who now controls things and make sure they contact you. Still laughing to myself (not at you) because it doesn't have to be this hard.
